

Group 16

Assignment 5

We have divided the entire webpage into three sections. We have implemented the corporate design on our website. The logo of our website named “QuickRail” is always in the top left corner, which will be a common aspect within all the pages. We chose the logo to be a train next to the name of the website “QuickRail” because the main purpose of the page is to search for train itineraries. Along with the logo, the top bar is also a common aspect for all the web pages of the web application. The top bar contains the home, explore, and contact us buttons. The home button when clicked will take you to the home page where you can input all the details of your desired trains. The explore button will send you to a page where you can find a list of all the trains that our company has, with a map of the route and all the stops that the specific train does. The contact us button takes you to a page that has information on all the team members (imprinting page). On the right part of the page, there's a contact form where customers can send any questions, doubts, or concerns about the website. We have also added our address. Social media buttons will take you to the individual links of each social media (currently not working).

Below you can see screenshots of our web site pages.
